INVESTMENT APPROACH

Edgewood's Large Cap Growth Equity strategy pursues long-term capital growth through a portfolio of 22 stocks of large-sized companies that are distinguished by their financial strength, levels of profitability, strong management, and an ability to deliver long-term earnings power. Our goal is to purchase companies that trade at discounts to their fair value and believe that, over time, the stock prices of high-quality companies will rise to reflect the true value of the underlying company. The Large Cap Growth Equity strategy's performance is typically benchmarked against the S&P 500 Index over a full-market cycle.

INVESTMENT PROCESS HIGHLIGHTS

Edgewood's Large Cap Growth Equity strategy pursues a bottom-up investment process to construct a portfolio of U.S. large-cap growth companies. The investment team looks for potential investments across the economy where it can find growth irrespective of the sector or industry.

Edgewood's investment process focuses on two distinct areas:

Stock Selection – The team's investment process begins by identifying companies that are distinguished by their financial strength, levels of profitability, strong management, and an ability to deliver long-term earnings power. The team searches for companies that are well positioned for long-term growth, driven by demand for their products and services, trading at discounts to their fair value, and are at an early stage in their profit cycle to benefit from the increased cash flows produced by the profit cycle.

Capital Allocation – Based on the investment team's fundamental analysis of a company's profit cycle and using a five-year discount to present value model, portfolio holdings evolve through three phases: Phase One investments are in the early part of their profit cycle and will warrant a more sizeable weighting once their profit cycle begins to grow; Phase Two investments are companies that are being increased to a larger weighting due to the relative attractiveness of their valuation which are moving through the strongest part of their profit cycle; and Phase Three investments are companies that are being reduced to a lesser weighting because they are nearing the team's estimate of full valuation or their profit cycle has begun to deteriorate.

PORTFOLIO CHARACTERISTICS AS OF 9/30/2024*

	EDGEWOOD	S&P 500**	COMMENTS
Market Cap Mean (Billions)	\$551bn	\$955bn	Focused on Growth
Number of Holdings	22	504+	Concentrated Portfolio
Most Recent Quarter YoY EPS Growth	34%^	2%	Focused on Earnings Growth
Sales Growth (3 Years Historical)	19%	12%	Focused on Revenue Growth
LT EPS Growth	24%	17%	Earnings Outlook

*All portfolio characteristics produced by Refinitiv and are rounded to the nearest whole number with the exception of the Most Recent Quarter YoY EPS Growth which is calculated by Edgewood.

Most recent quarter YoY EPS (year over year earnings per share) growth figures reflect the period ended 6/30/24 except for Adobe, Copart, Intuit, Lululemon, NVIDIA and Synopsys whose fiscal quarters differ. These numbers are calculated based on company earnings reports and exclude the impact of non-recurring items not indicative of the underlying business, where appropriate.

^ Blackstone's EPS figure is Distributable Earnings per share as we believe it is the most relevant valuation metric. Eli Lilly's EPS figure excludes the impact of acquired IPR&D charges because we believe it is most representative of Lilly's core business activities. Acquired IPR&D charges may be incurred upon execution of licensing agreements and other asset acquisitions. LLY does not forecast acquired IPR&D charges due to the uncertainty of the future occurrence, magnitude, and timing of these transactions. LLY's most recent quarter YoY adjusted EPS growth rate is 86%.

** 2023-2025 earnings estimates for the S&P 500 along with the current quarter year over year earnings per share growth and 5-year estimated growth rates are based on most recently available information provided by Bloomberg.

+Provided by S&P Dow Jones Indices. The S&P 500 is an unmanaged index with no expenses which covers 500 industrial, utility, transportation and financial companies of US markets. It is a capitalization-weighted index calculated on a total returns basis with dividends reinvested.
